# D-MRP X.0

FOOTWEAR MANUFACTURING INDUSTRY

# DIGITAL POWER IN **MANUFACTURING**

---

Implementing industry X.0 and building the  
digital factory

# About **D-MRP X.0**

D-MRP X.0 has wide range of capabilities that provide support to harmonize complex assemblies and heterogeneous materials involved in manufacturing operations.

*Move your business from spreadsheets to digital arena*

*Gain better foresight to improve manufacturing and planning*

*Optimize and revitalise supply chain and distribution*

## The D-MRP X.0 Solutions

D-MRP X.0 helps the manufacturers to control their resources with an easy-to-use solution that solves pressing issues encountered across the entire business operations.

### PRODUCTION

- Work Centers
- Shop Floor Orders
- Routing
- Production Scheduling

### CUSTOMERS

- Quoting / Estimating
- Warranty Tracking
- Sale Order Processing
- Shipping

## NOT SURE WHERE TO GET STARTED?

We offer ERP evaluation & implementation resources to help you make an informed decision about who you'll partner with for ERP. Start exploring today by visiting our product page:

[www.dawnbit.com/d-mrp-x-0/](http://www.dawnbit.com/d-mrp-x-0/)

## MATERIALS

- Inventory Control
- Purchasing
- MRP
- Physical Inventory Status

## FINANCE

- Product Costing
- Job Costing
- Financial Integration

## ENGINEERING

- Part Master
- BOM
- Product Configuration
- ECO Management

# Key Manufacturing Features

### Bill of Material

Build & maintain BOMs in one visual workspace with all relevant information available, & maintain part information.

### Planning Simulation

Carry out ATP simulations so you can test the impact of different material planning scenarios.

### Lot & Serial Tracking

Control & monitor, from receipt to shipment & the assignment of lot or serial numbers for components.

### Inventory Control

Track & maintain inventory balances for each part you stock, including finished goods materials.

### MRP

Material Requirements Planning balances the supply & demand for all component parts needed to satisfy your Master Schedule.

### Sales Order Processing

Enter sales orders, generate invoices & ship products, satisfy customer enquiries & ensure your sales team.

## Purchasing Control

Create & print purchase orders, track purchased materials, maintain vendor details & your finance requirements.

## Multiple Cost Sets

Track cost variances for material costs, labor costs and purchase costs by part, order number, or by work center.

# Salient Features

## EMPOWER YOUR WORKFORCE TO BREAK FREE FROM DESK-BOUND ERP WITH MOBILE TECHNOLOGY

- Return on Investment (RoI)
- No infrastructure cost as it as SaaS model.
- Easy integration with existing financial systems like tally.
- RFID / Biometric attendance.
- Bar Code / QR code enabled.
- Self Service portal.

Any Time

Any Where

Any Device

# Integration

## Option ---

### IoT Integration

Improve safety, keep track of resources, & enhance access to places / information.

### Accounting Softwares

Integration with financial accounting, create financial transparency for organisation.

### Payment Gateway

Faster & easier with advanced security & secure payment gateway.

### Artificial Intelligence

AI to improve manufacturing, quality control & shorten design time.

### Bulk E-mail Services

The module allows launching email & web push campaigns.

### Self Service Portal

The portal provides access to a wide range of our services at a time.

# Customer

## Care ---

D-MRP X.O supported by a very responsive & engaging backend with experienced domain experts.
